Low-code developer building AI agents and AI-assisted workflows with Claude Code in a banking environment. I design reusable, rule-driven automation: codified migration rules, context engineering and self-correcting test loops. Background in front-end development, accessibility (WCAG) and design tokens.

SKILLS

- **AI & automation:** Claude Code, AI agents, agentic coding, context engineering, prompt engineering, n8n, automated visual testing
- **Low-code & integration:** Eximee, BPMN/BPMS, Camunda, REST, SOAP
- **Front-end:** JavaScript, TypeScript, HTML, CSS/SCSS, Angular, WCAG, design tokens
- **Tools:** Git, GitLab, Jira, Confluence, SQL

EXPERIENCE

01/2026 – CURRENTLY

LOW-CODE DEVELOPER, CONSDATA

- Built an AI agent with Claude Code that audits UI artifacts of 6 banking processes against a new Figma-based visual identity, replacing inconsistent, duplicated and hardcoded styles with design tokens.
- Codified migration rules and patterns per client in the team repository, making the process reusable for further projects with minimal human input.
- Designed a self-correcting loop: the agent runs visual tests in the browser on test environments and iterates (changes, tests, fixes, up to 10 rounds).
- Migrated 12 banking processes from a legacy Java-based Apache ServiceMix integration to the company's BPMS in a 2-person team, retiring outdated technology. Analyzed the existing Java integration code to reconstruct its logic, then implemented JavaScript handlers in Eximee script code, authored soap-proxy configuration and SOAP envelope templates, using Gemini to accelerate generation of SOAP envelopes, scripts and OpenAPI specs.
- Developed business applications on Eximee: BPMN process modeling, dynamic forms and dashboards, validations, WCAG compliance, REST/SOAP and database integrations, performance optimization, participation in testing and production releases.

Tech - Claude Code | Gemini | Eximee platform | BPMN/BPMS | Camunda | JavaScript | HTML/CSS | SOAP | REST API | OpenAPI | Figma | Design tokens | Git/GitLab | Jira | Kibana | Linux

04/2025 – 12/2025

IT SPECIALIST FOR FIELD SUPPORT, DINO S.A.

- Prepared IT infrastructure for new retail locations and supervised vendors and SLA compliance.

Tech - GOLD System | POS System| Microsoft 365| Google Workspace | CCTV System Hikvision | Satel | Remote Desktop VNC | Fortinet

11/2021 – 11/2024

SOFTWARE ENGINEER, EPAM SYSTEMS

- Implemented WCAG accessibility standards in projects of one of the world's largest technology companies; remediated 100+ accessibility issues across multiple projects.
- Designed and implemented scalable design tokens (colors, fonts, spacing) and standardized style guides across projects, which simplified WCAG integration and improved consistency and maintainability.
- Worked directly with the client on troubleshooting and improvements, and partnered with product managers to streamline accessibility and standardization workflows.

Tech - JavaScript | Dart | TypeScript | SCSS | HTML

09/2019 - 10/2021

DEVELOPER, ACTURIS LIMITED

- Designed and implemented dynamic templates that automate the generation of insurance policy documents for brokers in the UK, Canada, Germany and France, working closely with QA and business analysts.
- Designed XML schemas compatible with the company's insurance data models and built reusable XSLT libraries, improving maintainability and consistency across projects.
- Trained developers, analysts and QA on XSLT best practices and created documentation and technical guides for a newly formed team.

Tech - XSLT| XML | HTML | CSS | SQL

EDUCATION

10/2015 - 02/2019

ENGINEER'S DEGREE - CONTROL ENGINEERING AND ROBOTICS,

WROCŁAW UNIVERSITY OF SCIENCE AND TECHNOLOGY

LANGUAGES

- ENGLISH - C1
- GERMAN - A1
- ITALIAN - A1

HOBBIES

- Process automation with n8n (personal workflows and app integrations) · hands-on experiments with AI tools for automation, data analysis and content generation · generative graphics
- Basketball
- Volleyball
- Sailing
- Escape room
- Photography
- Cooking

I HEREBY GIVE CONSENT FOR MY PERSONAL DATA TO BE PROCESSED FOR THE PURPOSE OF CONDUCTING RECRUITMENT FOR THE POSITION FOR WHICH I AM APPLYING
