

TOMASZ JURCZYŃSKI

Junior Low-code developer

Wrocław

tomekjurczynski@gmail.com

+48 600 309 977

I'm a Low-Code Developer who enjoys turning complex business requirements into practical, user-friendly applications. I specialize in building and optimizing solutions on low-code platforms, designing business processes with BPMN, and extending functionality using JavaScript, HTML, and CSS.

I work closely with business and technical teams to deliver scalable, efficient systems, with a strong focus on usability, performance, and automation. I'm always looking to grow—currently expanding my knowledge in cloud technologies, DevOps, and AI-driven solutions.

EXPERIENCE

01/2026 – CURRENTLY

JUNIOR LOW-CODE DEVELOPER, CONSDATA

Developing scalable business applications on the **Eximee low-code platform**

Designing and modeling business processes using **BPMN** within a **BPMS** environment

Extending platform capabilities using **JavaScript**, **HTML5**, and **CSS3**

Implementing business logic, validations, WCAG standards and workflow automation

Integrating external systems via **REST APIs**, **Web Services**, and **databases**

Building dynamic forms, user panels, dashboards, and data-driven UI components

Optimizing performance of workflows and applications

Supporting business users and translating functional requirements into technical solutions

Collaborating with Business Analysts and QA teams

Participating in testing and production releases

Technologies used - Eximee platform | JavaScript | HTML | CSS | BPMN/BPMS | Camunda | REST API | Jira | Confluence | Git | GitLab | Linux | Kibana | SOAP

04/2025 – 12/2025

JUNIOR IT SPECIALIST FOR FIELD SUPPORT, DINO S.A.

Coordinated and prepared IT infrastructure for new retail locations, including configuration of computer hardware, network devices, POS systems, and security solutions.

Collaborated with external vendors on the delivery and acceptance of IT systems and fire safety installations, ensuring compliance with technical requirements and corporate standards.

Oversaw and verified the quality of IT services provided by subcontractors, ensuring adherence to SLA agreements.

Maintained business continuity by troubleshooting and resolving IT issues in existing stores while providing end-user support.

Supported the opening of new stores by ensuring full operational readiness of IT infrastructure prior to launch.

Technologies used - GOLD System | POS System | Microsoft 365 | Google Workspace | CCTV System Hikvision | Satel | Remote Desktop VNC | Fortinet

11/2021 – 11/2024

SOFTWARE ENGINEER, EPAM SYSTEMS

Implementing Web Accessibility (WCAG) standards to the projects of one of the largest technology companies in the world. Applying best practices into projects to make the user experience top-notch, optimal and accessible to all.

Creating tokens to simplify WCAG integration in code.

Standardizing styles to align with WCAG standards for easier management.

Collaborating with the client to troubleshoot, discuss improvements, and implement fixes.

Accomplishments

Remediate Accessibility Issues: Successfully remediated 100+ accessibility issues across multiple projects, improving user experience for people with disabilities.

Implement WCAG Standards: Implemented WCAG standards in several large projects, significantly increasing compliance rates.

Codebase Standardization: Standardized style guides across projects, ensuring consistency and maintainability.

Design Tokens Implementation: Implemented a scalable tokens to manage colors, fonts, and spacing, improving maintainability and consistency.

Cross-Functional Teamwork: Partnered with product managers to streamline accessibility and standardization workflows.

Technologies used - JavaScript | Dart | TypeScript | SCSS | HTML

09/2019 - 10/2021

DEVELOPER, ACTURIS LIMITED

I worked for a company that provides software for insurance brokers mainly in the UK, but also in Canada, Germany and France. I was responsible for creating documents that have many dynamic elements and are generated based on data from the application. In every project I participated I worked closely with the QA team and business analyst. I started working in a newly formed team so I was also part of the process of developing the team, creating documentation, introducing ways to better develop the team and training.

Accomplishments

Streamlining Document Generation: Successfully designed and implemented dynamic templates that automate the generation of insurance policy documents

XML Data Handling: Designed efficient XML schemas to ensure compatibility with the company's insurance data models and reduce errors.

Standardization: Established reusable XSLT libraries for frequently used transformations, improving maintainability and consistency across projects.

Cross-Team Collaboration: Collaborated with business analysts and QA testers to refine requirements and ensure accurate data representation in documents.

Training and Mentorship: Conducting training sessions for developers, business analysts and QA testers on XSLT best practices, internal standards and processes boosting teams productivity and reducing time to implement new projects, testing and development.

Knowledge Sharing: Created documentation and technical guides for XSLT/XML processes, fostering team knowledge-sharing initiatives.

Technologies used - XSLT | XML | HTML | CSS | SQL

EDUCATION

10/2015 - 02/2019

ENGINEER'S DEGREE - CONTROL ENGINEERING AND ROBOTICS,

WROCŁAW UNIVERSITY OF SCIENCE AND TECHNOLOGY

HARD SKILLS

- JavaScript
- BPMN
- WCAG
- XML / XSLT
- Angular / Angular Material / RxJs / NgRx
- TypeScript
- Agile / Scrum / Kanban
- Eximee
- Accessibility in HTML / CSS / JavaScript
- HTML
- CSS / SCSS / SASS
- Camunda
- SVN / Git / GitHub / GitLab
- SQL / MySQL

SOFT SKILLS

- Time management
- Communication
- Teamwork
- Analytical thinking
- Creativity
- Responsibility
- Adaptability
- Task prioritization

LANGUAGES

- ENGLISH - C1
- GERMAN - A1
- ITALIAN - A1

HOBBIES

- **Process automation with n8n** – building personal workflows and experimenting with app integrations in hobby projects, expanding my knowledge of modern automation tools.
- **Artificial Intelligence** – exploring AI through hands-on testing of tools for automation, data analysis, and content generation as part of self-development.
- **Generative graphics** – enhancing creativity by experimenting with AI-generated visuals, developing personal artistic and conceptual projects.
- Basketball
- Volleyball
- Sailing
- Escape room
- Photography
- Cooking

I HEREBY GIVE CONSENT FOR MY PERSONAL DATA TO BE PROCESSED FOR THE PURPOSE OF CONDUCTING RECRUITMENT FOR THE POSITION FOR WHICH I AM APPLYING
